

STUDENTS ACHIEVE - PARENT PORTAL

This fall, all South East Cornerstone schools moved to a new reporting tool, **Students Achieve**, for all students and classes in Grades 1 through 9, called **Students Achieve**. Students Achieve is specifically designed to report on a student's achievement of individual course outcomes, the method of assessment and reporting that South East Cornerstone adopted several years ago.

Parents and guardians now have access to the **Student Achieve Parent Portal** to view their child's progress, just as you have been able to do so in the past through **Home Logic**. In fact, you will continue to use Home Logic to access the records of all of your children, from Grades 1 – 12, though this single site.

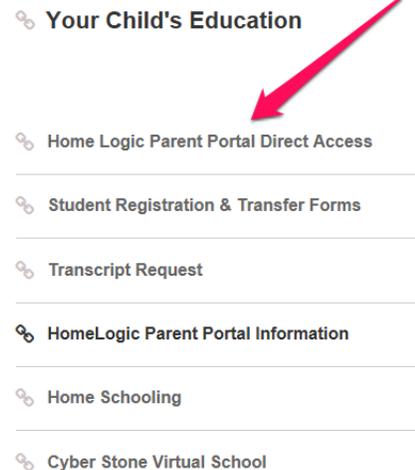

HOW TO ACCESS THE PARENT PORTAL

1. If you have not already done so, create a Home Logic account. You'll find instructions provided on a separate handout.
 - Contact your local school if you have forgotten your Home Logic login. Your school administrative assistant will be happy to help.
2. Log into **Home Logic** from our newly redesigned school website:

Or type in the direct link to Home Logic:

<http://gradebook.cornerstonesd.ca/HomeLogic/>

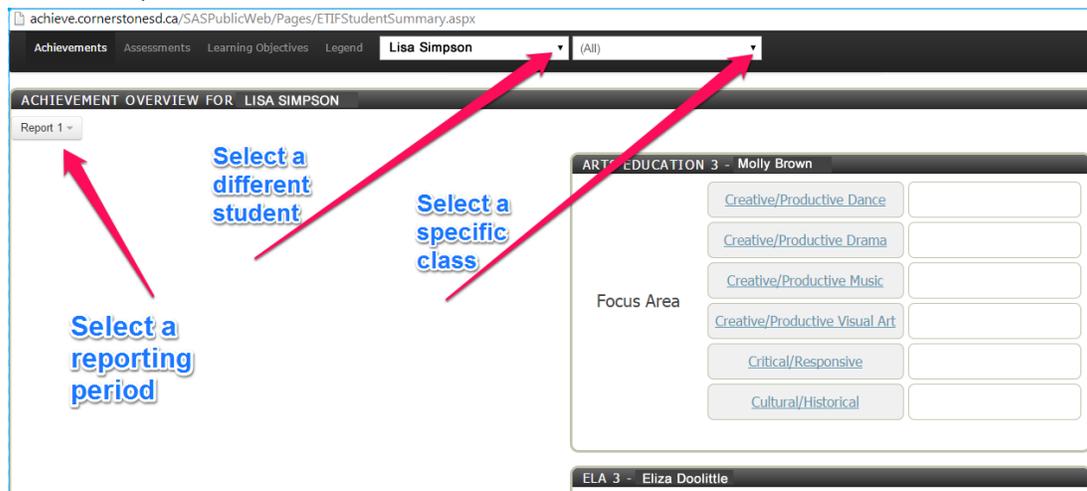

3. After logging into Home Logic, you'll find the link to the Grade 1-9 Students Achieve Parent Portal in the navigation section found on the left of the screen

QUICK START GUIDE TO USING THE STUDENTS ACHIEVE PARENT PORTAL

The Parent Portal opens on the Achievement Overview screen.

There are different ways to move around the Parent Portal, but the menu items at the top is one way to get to all areas. What you will find at each:

Achievements Displays a list of all classes and the major strands or focus areas that make up each course. For all Grade 6 - 9 subjects, the seven Social Skills and Work Habits are also listed.

Clicking on one of the individual focus area links will take you directly to the Learning Objectives screen.

Assessments Brings up a list of all assessment – Upcoming, Current, and Past for the student, for all subjects.

Clicking on the name of any assignment brings up additional detail about that assignment – including assessment date, task type, assessment type and the student's achievement for any outcomes assessed.

A note about assessment type –

Formative assessments are used to *check student learning* to provide feedback for both teacher and student that can be used to improve student learning. Results/marks for formative assessments are coloured grey.

Summative assessments serve to *evaluate student learning*. Results for summative assessments are coloured green (mastered and attained), yellow (beginning) and red (experiencing difficulty).

Learning Objectives Provides the overall result for each individual outcome assessed as well as all individual summative assessments used to assess that outcome.

Clicking on the name of an individual assessment provides details of the assessments, described above.

Legend Provides descriptors for the M A B E I scale and for the Social Skills and Work Habits (SS/WH).
